This should be done by the age of 3 to 6 months, if this dog is a puppy. Females are to be spayed and males neutered to control overpopulation and additional unwanted animals. If after 8 weeks of age but unable to be altered yet, arrangements are to be made with your vet, email sent to us. There will be a returnable deposit left with the rescue at time of adoption. Upon receipt of an email from your vets office stating the puppy has been altered, your deposit will be returned to you. At the time of adoption, you will get a record of any vetting that has been done on this pet. We suggest you take this new pet to your vet within 10 days of adoption for a general check-up and a meet and greet with future medical provider for this pet.
